25X1

MEMORANDUM FOR: Director, NPIC

SUBJECT: Notification of Changes in Mission Operation

REFERENCE: Memo to D/NRO and DD/S&T dated 27 May 1965, Subject as Above,

25X1

1. I certainly endorse your position NRO should notify NPIC of any operational changes which may affect NPIC operations. We have determined there are no provisions in the [redacted] manual for notifying NPIC of such a change. We have taken steps to correct this situation.

25X1

2. It is my understanding the 180 degree change in vehicle position on Mission 1021 was discussed in the 8 April 1965 meeting of COMOR. NPIC was represented at this meeting. While this discussion cannot be considered formal NRO notification, it did constitute an alert that such action was planned.

25X1

ALBERT D. WHEELON
Deputy Director
Science and Technology

Attachment: [redacted]
